

## Certificate

This is to certify that the institution follows infection control protocol during clinical teaching.

Here with providing report of various infection control measures undertaken in the institution.

1. Central Sterile Supplies Department (CSSD), registers are maintained for the supply of sterile materials for the different departments for use.
2. Personal Protective Equipment (PPE), register is maintained for the provision of PPE while working in the clinic specially during COVID 19 pandemic and carrying out interventional procedures on HIV positive, hepatitis B positive ,or malignancy cases.
3. Patients Safety Curriculum , a proper well defined protocol is followed while treating patients giving at most priority to the safety. Aseptic work areas, autoclaving , and use of disposable material is done. Patients consent is mandatory.
4. Periodic Fumigation/Fogging for all clinical area, register is maintained for fumigation of all operative areas in the departments of periodontology, oral surgery, Implant section of department of prosthodontics. During

COVID 19 pandemic fogging and disinfection of the entire hospital was carried out.

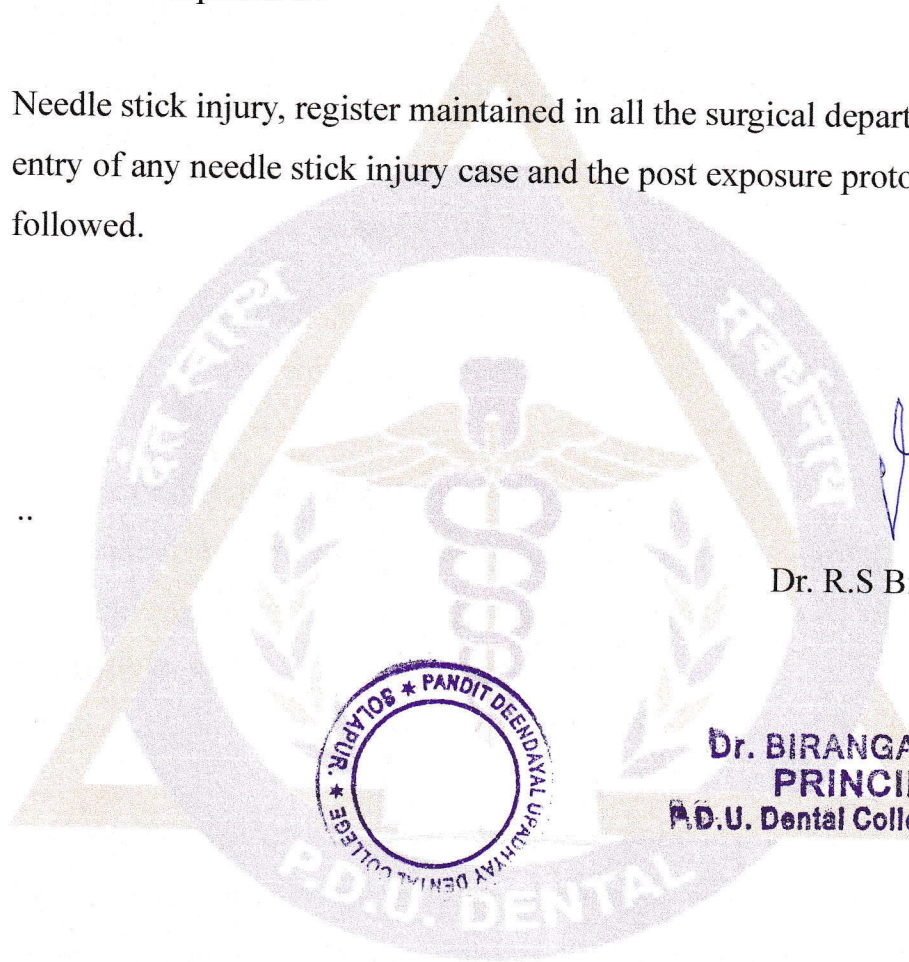

5. Immunization for all the care given, register is maintained for immunization of the 3<sup>rd</sup> year BDS students before they start working in the clinics for hepatitis B.
6. Needle stick injury, register maintained in all the surgical department for entry of any needle stick injury case and the post exposure protocols to be followed.

## **INFECTION CONTROL COMMITTEE**

Date of committee formation: 11/1/2020

### Functions and objectives

1. To monitor monthly intradepartmental infection control
2. To encourage Hepatitis B vaccination for students and staff (teaching and nonteaching)
3. To create awareness regarding needle stick injury post exposure prophylaxis
4. To monitor supply and use of personal protective equipment on regular basis
5. To prepare patient safety manual
6. To monitor management of biomedical waste according to protocol

## **CODE OF CONDUCT**

1. The committee holds meeting quarterly
2. The committee monitors activities for sterilization protocol; fumigation process, needle stick injury and use of PPE.
3. Committee also take care of sensitizing all the supporting staff regarding BMW, autoclave fumigation needle stick injury and time to time vaccination.
4. Students are encouraged to use PPE while working in the clinic and made aware of standard infection control protocols and vaccinated for Hep B before they start their clinical postings.
5. All the hospital staffs are advised to follow rules and regulations mentioned in the patient safety manual.

## Patient safety

World health organization defines patient safety as “the reduction of risk of unnecessary harm associated with healthcare to an acceptable minimum.” The most important challenge in the field of patient safety is prevention of harm, particularly avoidable harm, to patients during treatment and care.

In PDUDC patient safety is an important component while providing the quality of oral health care. Patient safety policies of the institution help in avoidance of adverse events (accidents, errors and complications) associated with dental health care and to limit the impact of inevitable adverse events. Further this manual will also help to detect early and limit non preventable harm.

## Who all shall follow it?

All health care providers shall follow the guidelines and policy statement for patients.

## Policy statement for patient safety manual

PDUDC promotes all health care providers to follow the policy statement to encourage patient safety.

1. To promote safe patient care in hospital setup
2. To promote prevention of cross infections by following infection control practices.
3. The infection control committee members regularly monitor the stringent implementation of policies laid down.
4. Patient safety is also considered in terms providing emergency care in dental office, cleanliness and sterilization protocol for maintaining instruments and equipment.
5. Health care providers are advised to use personal protective equipment while working on patients and dispose them off according to guidelines after usage.
6. Every student and all the employees of PDUDC are vaccinated for HepB
7. Complete details of patients are mentioned for complete identification that includes (Age, Gender, Date of Birth, address, phone number and identification marks).
8. A detail medical and dental history record along with detail evaluation of area of chief complaint is mandatory for ensuring patient safety during each visit. Special attention is given if any patient gives history of allergies.
9. Each department has its own guidelines for conducting various procedures and also monitoring by qualified faculty members.
10. Precautions also taken such that each patient is exposed minimally to the ionizing radiations while taking radiographs.
11. Prevention of antimicrobial resistance –
  - a. Stronger infection control measures like aseptic technique
  - b. Maintenance of hygienic medical facilities

✓  
**Dr. BIRANGANE R.S.**  
**PRINCIPAL**

- c. Due to implementation of vaccination are utilized to limit the spread of resistant microorganism and thus reducing antimicrobial resistance
  - d. To achieve this goal, the global action plan as set by WHO with its five strategic objectives is implemented.
    - i. To improve awareness and understanding of antimicrobial resistance;
    - ii. To strengthen knowledge through surveillance and research;
    - iii. To reduce the incidence of infection;
    - iv. To optimize the use of antimicrobial agents;
    - v. Develop the economic case for sustainable investment that takes account of the needs of all countries and increase investment in new medicine, diagnostic tools, vaccines and other interventions.
12. PDUDC has very strong patient feedback policy which helps in maintaining standard and patient safety.
13. Institute has established system for biomedical waste management protocol which comprises of:
- a. Regular monitoring of biomedical waste in each department by infection control committee members on daily basis.
  - b. Proper segregation and waste disposal according to the color coding according to standard protocol.
  - c. Periodic awareness lectures are taken for students and paramedical staff is taken.

### **HEPATITIS B IMUNIZATION POLICY**

Immunization policy helps in reducing the risk of being infected for various diseases. 3<sup>rd</sup> year student entering the clinics are immunized for hepatitis B since 2022 year. Three doses of Hepatitis B vaccine are given at 0, 1 and 6 month.

### **POST EXPOSURE PROPHYLAXIS (PEP)**

Dr. Binod  
PRINCIPAL

According to CDC and WHO guidelines PEP (Post exposure prophylaxis) means taking antiretroviral medicines (ART) after being potentially exposed to HIV to prevent becoming infected. Health care providers working in the institute are advised to use of PPE while working on patients and take proper precautions while working on patients. However, if health care providers and patients are suspected to exposure to any kind of infections such as HIV/STD/Hepatitis B and Hepatitis C infection then laboratory test should be carried out. If the tests are positive then proper counselling and retroviral therapy should be given according to the guidelines.

## NEEDLE STICK INJURY

According to Needle prick injury are the accidental injuries caused by needles and sharp objects on skin. Institute follows WHO and CDC guidelines for management of needle stick injuries which include:

1. Immediately washing injury site with soap and water.
2. Initiating injury reporting system in the institute.
3. Reporting employee to emergency department and other PEP management facility.
4. Testing immediately and confidentially for HIV/Hepatitis B and Hepatitis C infection.
5. Simultaneously reporting is done in the emergency department in attached medical hospital which has established system for managing PEP as per guidelines.
